Impressive Dedication Service At New United Church

The new United Church in Oyen, was dedicated last Sunday at the morning service by Rev. H. D. Leitch of Drumheller, assisted by the pastor, Rev. H. C. Woods and Rev. J. D. Woollett of Cereal.

Pleasingly decorated for the occasion with plants and flowers the church looked beautiful and when the service commenced at 11 a.m. extra seating had to be arranged for the congregation.

Rev. Leitch again addressed the congregation at the evening service.

On Monday evening the ladies aid served a banquet in the church basement at 6 o'clock. This was followed by a program in the church auditorium and an address by Rev. H. D. Leitch on "People We Meet and Do Not Wish To Meet Again". Those taking part in the program were: Messrs Robert Nisbet, Fred Radatz, Harry Austin, Roy Cutlan and Gordon MacArthur, and Mrs. M. G. Whitlock and Mrs. F. Radatz.

Rev. H. C. Woods, fittingly expressed the thanks of the Board of Stewards and the congregation to Rev. Leitch for coming to dedicate the church, and their appreciation of his addresses. The program was concluded with the singing of the National Anthem.

IN LOVING MEMORY

MRS. Wm. GREEN
Died May 2, 1928.

We miss thee from our home, mother,
We miss thee from thy place,
A shadow o'er our life is cast,
We miss the sunshine of thy face;
We miss thy kind and willing hand,
Thy fond and earnest care;
Our home is dark without thee,
We miss thee everywhere.
Inserted by
Husband and Family.

LEGAL NOTICE

GOVERNMENT LIQUOR CONTROL ACT OF ALBERTA

Application For Beer License

PUBLIC NOTICE is hereby given that the undersigned intends applying to the Alberta Liquor Control Board for a License to sell beer by the glass or open bottle, for consumption in conformity with the provisions of the Government Liquor Control Act of Alberta, and regulations made thereunder, with respect to the following premises, known as—
The Sibbald Hotel, Main Street, Sibbald, Alberta, Lots 1 and 2, Block 2, Plan No. A.V. 5688. Location of beer sales room ground floor, facing south west corner of building.
Dated at Oyen, Alberta, this 9th day of April, 1930, A.D.

WILLIAM MALONEY,
Applicant.

Oyen Theatre Opens With Talkies Friday

The installation of equipment for showing all talking pictures, was completed in Oyen Theatre last week and everything is now in readiness for the opening night, which is Friday, May 2.

Great entertainment is promised to theatre patrons in the opening all talking and singing picture "It's a Great Life", which is filmed in technicolor sequences.

Heading a strong cast, the Duncan Sisters have put "It's a Great Life" over the top with a bang. Song numbers you will remember are "Following You," "Sailing on a Sunbeam," "The Hoosier Hop," "It Must Be an Old Spanish Custom," "Won't You Be My Lady Love," and "Son of a May Morning." Don't miss seeing this "all talking" picture Friday or Saturday.

First Fortnightly Crop Report

Issued by the Department of Agriculture, Province of Alberta, April 25, 1930.

Telegraphic reports received by the Department of Agriculture indicate that in the southern part of the province from 40 to 75 per cent of wheat is sown. Over all of the southern area moisture is sufficient for germination and over a large part is abundant. In the central sections of the province, reports indicate seeding of wheat to be from 35 to 75 per cent completed with sufficient moisture for germination but no reserve. Most of this area has received some moisture during the month of April and on April 24 and 25, snow and rain fell over a large area of the eastern part of the province.

In the Peace River district, heavy rains north and south of the Peace on April 24, have delayed seeding for several days. Very little grain has been sown north of the Peace while to the south more than half of the area has been seeded. It is estimated that there is an increased crop area in this district of 25 per cent and that moisture conditions are the best in twenty years.

There is not likely to be much decrease in the acreage sown to wheat throughout the province. There will be however, an increase in the acreage of coarse grains making a considerable increase in the total acreage sown. The small acreage of winter wheat sown has suffered severely from winter killing.

Live stock is reported to have come through the winter in fair condition.

RESOURCES BE CONSIDERED BEFORE BUDGET

Ottawa, Ont.—Legislation dealing with the return of the natural resources to the western provinces will be dealt with by parliament before the budget is brought down.

It was stated by Premier MacKenzie King at the conclusion of a cabinet meeting. The prime minister said that it had been hoped to discuss of this legislation, which has for its object return of the natural resources to Manitoba, Saskatchewan and Alberta, as well as the lands in the Peace River block and railway belt to British Columbia, before the Easter recess.

The House of Commons had not been able to put through the legislation, so it would be gone on with when parliament resumed, but the introduction of the budget.

The date when the budget will come down depends to a certain extent, on the progress which is made with this legislation. The prime minister made no announcement as to when the statement of the finance minister may be expected.

While Mr. King gave no intimation as to try and get through before the budget comes down.

Once the budget is introduced in the House, debate on it will be practically continuous, probably for some weeks.

There is also the possibility of the budget debate becoming so strenuous that dissolution of parliament might be precipitated. In that event the natural resources legislation would fall by the wayside, and the work which has been done might be of little avail.

Two Vancouver

Teachers Drowned

One Sacrificed Life in Attempt To Rescue Friend

North Vancouver, B.C.—J. A. Hyndman, Vancouver, and F. E. Lofthian, Vancouver, teachers in Catholic school, were drowned in Lynn Creek before the eyes of 18 girl pupils they had taken for a boat ride.

Mr. Lofthian sacrificed his life in a gallant attempt to save his friend. The party had reached Second Canyon and Mr. Lofthian, who was crossed the large log that serves as a bridge, when Mr. Hyndman lost his balance halfway across and fell into the boiling current.

Without hesitation, Mr. Lofthian plunged into the swollen creek, but failed to reach his friend before both were swept over the falls and perished.

Aliens Risk Death

To Reach States

Caught By Officers After Crossing Niagara River Above Rapids

Niagara Falls, N.Y.—Crossing the Niagara river in a frail boat, a short distance above the rapids to the treacherous whirlpool rapids, four aliens braved death in their attempt to enter the United States illegally. The aliens were caught by immigration border patrolman after they ascended the 200-foot bank of the gorge by means of an iron ladder that runs down a steep cliff, but the runner who had transported them escaped.

Japanese Royalty Starts Tour

Yokohama, Japan.—Japan's Imperial family, Prince and Princess Takamasa, sailed from this port, aboard the "Kashima Maru," for Europe, on a honeymoon, which will last over a year, and will encircle the globe. They will visit most of the courts of Europe and will spend six weeks in Canada, probably before sailing for home, from some Pacific port, around May 1, 1931.

Plots For Prince Killed

Cairo, Egypt.—Aeroplane in which the Prince of Wales travelled here from Khartoum crashed at Heliopolis aerodrome shortly after taking off on its return flight to Khartoum. The occupants were killed. The deaths were reported by Sir H. Barron and Alerstam's C. Davies.

Looking For Honors

Geneva.—Venezuela representative at the League of Nations headquarters here asked that his country should have next turn in supplying the president of the league. His request was referred for decision to the next session of the league council.

W. N. O. 1835

Parachute Saves Aviator

Plane Crashed From Great Height At Sacramento, Cal.

Sacramento, Cal.—Lieut. T. A. Woodring, 95th Pursuit Squadron, Rockwell Field, San Diego, leaped to safety with his parachute when his plane crashed on Mather Field from a height of 2,000 feet during a "dog fight" manoeuvre.

Captain H. M. Elmdorff and Lieut. Woodring had withdrawn from the pursuit formation, flying in view to observe an aerial manoeuvre. Suddenly something was seen to fly off Woodring's plane, and at the same instant the flyer leaped from the cockpit. He floated to the field uninjured. The plane crashed within 300 feet of the spot where the pilot landed.

Lieut. Woodring was pilot of the plane which, in the summer of 1927, was in fatal collision with that of Lieut. Thad Johnson, as the latter missed his landing at Uplands Field, Ottawa, at the end of a flight as part of the escort to Col. Charles A. Lindbergh who flew to the Canadian capital to take part in the celebration of the Diamond Jubilee of Confederation.

Johnson jumped as Woodring's smaller machine was about to crash of his machine, but he was too close to the ground and his parachute failed to open.

Australia Wants Native Viceroy

Chief Justice Of High Court Has Been Recommended For Office

London, Eng.—The old and much disputed question of whether the British dominions should have governors-general of their own nationality is likely to be settled once and for all by the decision of the British High Court of Justice, which has recommended that the successor to Lord Stenhouse should be an Australian.

Sir Isaac A. Isaacs, chief justice of the Australian high court, has been recommended as the Commonwealth's next governor-general, and although the dominions office here is silent, it is understood that a precedent in this connection will probably be established.

Sydney, Australia.—Addressing the first annual meeting of the new Australian parliament, Rt. Hon. William McKinnon, Australian prime minister, said that the matter to the party who governed Australia so long as it was a British colony should have given the party who would support good government wherever they found it. He had some criticism, however, for the recent government of Rt. Hon. Stanley Bruce, declaring its only remedy for the financial depression was reduction of wages.

Received By King George

Canadian Minister To France Has Interview At Windsor Castle

London, Eng.—Canada's minister to France, Hon. Philippe Roy, was received by the King at Windsor Castle where he spent 20 minutes chatting with His Majesty, mostly about Canada.

He was surprised at the health and vigor of the King. Mr. Roy said after the interview, "I was formerly a little sceptical that I could judge, I think the King is in better health than he has been for many years."

Mr. Roy told His Majesty that when he (Roy) was a student at Laval University in Montreal in 1901, the King of the Order of St. John was visiting Canada.

The Canadian minister has seen King George on several occasions since, but this was the first opportunity of speaking to him since his appointment as Canadian minister in London.

Ship Enters Wrong Port

Orders Mixed and Seattle Cargo Sent To Vancouver

Vancouver, B.C.—One often hears of persons getting into wrong hotel rooms, but seldom hears of a vessel getting into a wrong port. The tanker "Los Alamos," bound from San Pedro to Seattle, arrived here and asked the harbor agent for orders. The master of the vessel soon found out, however, that somebody had blundered and his cargo was bound for Seattle, not Vancouver. He and his vessel got out of port on the same tide.

The agents are trying to find out who blundered. A "bad half-hour" is promised for someone.

Starts New Air Service

New York, N.Y.—Still blazing new air trails, Col. Charles A. Lindbergh has inaugurated the new trans-Atlantic service by making a dawn-to-dusk flight from Havana to Cristobal, Canal Zone.

C.N.R. To Be Reconstructed

Enforcement Of Amalgamation Of All Companies Is Specified

Ottawa, Ont.—The reconstruction of the financial structure of the Canadian National Railways will be started from this session of parliament with the passage of a bill to amalgamate into one corporate body all of the various companies which now make up the C.N.R. Intimation to this effect came from the Department of Railways and Canals. It is not expected, however, that the further steps of consolidating the various bond issues and otherwise reorganizing the whole financial structure will be proceeded with this year.

The bill to consolidate the companies, it is believed, will not be contentious and will go through with little discussion; but to deal with the financial structure would take a great deal of time, even if the preparatory work far enough advanced, which includes consoling of the various bond-holders. If there is to be a general election this year, legislation taking up so much time would likely find the going difficult.

French Flier Honored

Notable Figures In Aviation Attended Funeral In New York

New York, N.Y.—Representatives of the French Government and notable figures in the field of aviation, including Col. Charles A. Lindbergh, paid their last respects to Henri de la Vaulx, president of the Federation Aeronautique Internationale, who was killed in an accident at Jersey City, N.J.

While aeroplanes circled in formation overhead, the Rev. Theophile Wocher conducted a requiem mass for the French church of St. Vincent de Paul. Then the body was removed to the French line pier to sail on the "Le Grasse" for the dead aviator's native land.

BIG INDUSTRIES MAY LOCATE IN COAST PROVINCE

Vancouver, B.C.—Three major industries are making extensive investigations with the object of establishing in British Columbia, and one of them—a very large manufacturing plant—is almost certain to decide in favor of this province, according to Premier S. F. Tolmie, who passed through Vancouver en route to Victoria after a visit to British Canada.

The premier's visit to Ottawa convinced him that the International Hockey Union Treaty will be signed at the present sitting of the Dominion Parliament providing amendments which may be made by the United States are satisfactory.

The premier said that the Dominion Government will investigate the value of the section of the proposed Alaska Highway. Premier Tolmie said that British Columbia would be a debt to the members of the Australian luncheon delegation, whom he met in Ottawa. There is much evidence he said, of the thoroughness with which they did their work.

While in Ottawa the premier took up the matter of the five-year census for British Columbia. The prairie provinces enjoy this at present and he feels that British Columbia would benefit from the same provision. He promised to pursue the matter further.

One Day Old, but Lively

Every spring millions of baby chicks go out from the British Columbia coast and Vancouver Island to the interior of the province and the Prairie Provinces. Hatched earlier on the milder Pacific slopes than elsewhere in Canada, they are rushed by Express across the country to poultry dealers inland. Taken when they are but one day old, they are placed in cardboard boxes with breathing holes punched in them and loaded into express cars kept at just the right temperature for their benefit. They can go 72 hours without food or water. Above package has just been landed at Vancouver, and is being examined prior to train shipment. According to officials of the Canadian Pacific Express Company which annually handles millions of these fluffy balls, the traffic is growing steadily from year to year.

FRENCH MOTOR EXPERT

At 37, French Motor Expert

Mrs. Anneliese Norden is probably the most efficient woman in all of France when it comes to knowing her car. At 37, she is a French motor expert. Her husband, who is an automobile, aeroplane, marine or any other variety of engine, Mrs. Norden knows as much if not more about them than many so-called male experts.

She is a French motor expert. Her husband, who is an automobile, aeroplane, marine or any other variety of engine, Mrs. Norden knows as much if not more about them than many so-called male experts.

Athlete From West

Again In Limerick

Elbel Catherwood Training For

Spokane, Wash.—After a long lay-off, Elbel Catherwood, from Saskatoon, who set the athletic world taking when she came out of the west thirty years ago, is resuming her short-jumping activities shortly. The holder of the girls' world's record of five feet three inches, made at the 1929 Olympic games, has jumped at a meet only once since her return from Amsterdam, and then only gave an exhibition at the Coliseum in the following February. Last summer she spent several weeks while training and the injury was long in healing, keeping her out of all the meets. She will give a special exhibition at the Shriners' sports in June. Walter Knox and "Alb" Chilcott will look after her training at Hampton Park.

Coming To Canada

British National Union Sending Party Of Farmers On Tour

London, Eng.—The British National Union, it is announced, is arranging to send a party of farmers to tour Canada during August and September. There had been a great deal of talk lately of British agriculture being "behind the times," and it would result from the visit may be of value to the party while it is possible they may also be able to give some counsel on certain portions of the soil with which those of the homeland have had more experience than the farmers of the new world.

Expect Early Release

Toronto.—Chinese officials are in communication with the captors of Rev. C. A. Bridgman, Canadian United Church missionary in West China, and hope to negotiate an early release, said a cablegram to foreign mission offices in Canada from the mission station at Chungking, West China.

France Denies Report

Paris.—Information appearing in newspapers of foreign countries to the effect that France would build a new cruiser of 27,000 tons, armed with eight guns of 12-inch calibre, has been officially denied.

King May Appear With New Post Laureate

Successor To Dr. Robert Bridges Not Yet Named

London, Eng.—The literary and official public too are wondering who will be the next poet laureate, or if indeed there will be any successor to Dr. Robert Bridges. The question of whether his honorary position would lapse was raised after the death of Lord Tennyson, and Tennyson's successor, Austin, was not appointed until Tennyson had been dead four years.

Lord Tennyson, who died in 1892, was the last poet who actually performed in any measurable degree the direct duty of the poet laureate, namely, the writing of a poem or ode when the monarch was buried with anything of extra moment. The day for writing poetry at the king's command has, of course, long since gone.

But it is likely that His Majesty, after a reasonable interval will, on the advice of the prime minister, confer the title of poet laureate upon some scholarly man of verse and of course this special royal recognition of poetry, which began as early as the days of Chaucer, who received an allowance of wine from the King's wine buds.

Noted Soldier Dead

Sir Gordon Guggisberg Served Empire For Many Years

London, Eng.—Few men have had a more versatile career or a greater variety of Empire service than Sir Gordon Guggisberg, noted soldier and colonial administrator, whose death here came as a shock to official circles. He had been governor of British Guiana since 1928. He was 60 years of age and Canadian-born, his birthplace being Toronto.

Sir Gordon Guggisberg had a distinguished career in the war and before and after the war served his king in the east, in Africa and in South America. Sir Gordon was a graduate of the Royal Military College at Sandhurst, and while in the army he was for a long time slow matter for Gordon Guggisberg, in this he suffered what was but the inevitable lot of most peace time soldiers.

Canadian Prisons Fireproof

Ohio Disaster Could Not Happen Here

Ottawa, Ont.—"Positively impossible," was the comment of General W. M. P. Hughes, superintendent of penitentiaries here, when asked if a fire such as destroyed the Ohio state penitentiary with the loss of more than 300 lives could happen in any Canadian penitentiary. "Our penitentiaries," said General Hughes, "are entirely fireproof."

All the cell blocks in the Canadian penitentiaries were fire-proof, he said.

TREATY SIGNED BY DELEGATES OF FIVE POWERS

Original Date Was Not Convenient For All Officials

Winnipeg, Man.—Party of prairie premiers, sent for Winnipeg, to discuss immigration, has been indefinitely postponed. Premier Bracken of Manitoba stated that the conference, at which a policy was expected to be outlined for Manitoba, Saskatchewan and Alberta, will probably be held some time next month.

The original date, April 29—was found not to be convenient for all officials concerned. If, and when the prairie premiers do gather at Winnipeg, their season will be preliminary to the Dominion conference at which the provinces will be represented. Such a conference is planned for mid-summer at Ottawa.

Quarantine Districts Selected

Ottawa, Ont.—Several rural municipalities in Saskatchewan have been constituted into restricted areas or quarantine districts for the eradication of bovine tuberculosis under the animal contagious disease act. The proclamation creating the restricted areas has been officially issued. Municipalities involved are Moose, Cochrane, Lacombe, and the town of Wood Creek and Big Arm.

Water Tests For Churchill

Ottawa, Ont.—Tests of the water which is to furnish the supply of Churchill are being made for the Department of Railways and Canals here, and no far the results have been satisfactory. The chief fear was that the water would be too warm for the water which is to furnish the supply of Churchill. The water is what is termed "hard," it is suitable for human use.

DISORDER IS SPREADING IN INDIAN EMPIRE

Bombay, India.—British authority is confronted with an increasing grave situation in India. Serious rioting and fighting with troops was reported in widely-separated sections of the Empire as the anti-government movement spread. An Indian rebel, armed with two revolvers, was killed at Chittagong, after grave disorders at Peshawar—thousands of miles to the west.

At Peshawar, important outpost city near the entrance to Khyber Pass, one or more British soldiers and 20 native rioters were killed reports said, when a mob protested arrest of several anti-government agitators.

A Lahore despatch, explaining the cause, said that the outbreak was suppressed only when Gurkha troops poured machine-gun and rifle fire into the mob, which had held up an arrested police officer on the street, and burned it. Both occupants were burned to death.

At another point in the bazaar, a British sergeant on a motorcycle approached the rioters, who pulled him off his machine and hauled him on the ground with their hands. He was said to have died of his wounds. The deputy commissioner of police and his police force were badly wounded and sent to hospitals.

British and Gurkha troops took absolute charge of the city, and were said to be maintaining a strong guard at the gates to prevent incursions by the hill tribesmen, who are of far different race from the plainsmen, and who swarm down when there are disturbances with the hope of loot. There are sections about Peshawar over which British authority never has been fully extended.

Alberta's Election Date Set

June 19 Is Day Selected According To Official Announcement

Edmonton, Alta.—The Alberta provincial election will be held on Thursday, June 19. Official announcement of the date was made by Hon. George Hensley, acting premier, speaking for Premier Broderick, who is at present at Vancouver.

The government still has one year of the five-year term to serve, but the outcome of the election has not been entirely unexpected as there have been rumors for some time that this would be the case.

The following statement was issued by Hon. George Hensley, on behalf of Premier Broderick, in announcing the election.

"In keeping with its promise during the recent session that if an election were to be held this summer ample notice would be given, the government announces its decision to hold an election on Thursday, June 19, with polling day fixed for the nineteenth of June."

Conference Of Premiers Indefinitely Postponed

Original Date Was Not Convenient For All Officials

Winnipeg, Man.—Party of prairie premiers, sent for Winnipeg, to discuss immigration, has been indefinitely postponed. Premier Bracken of Manitoba stated that the conference, at which a policy was expected to be outlined for Manitoba, Saskatchewan and Alberta, will probably be held some time next month.

The original date, April 29—was found not to be convenient for all officials concerned. If, and when the prairie premiers do gather at Winnipeg, their season will be preliminary to the Dominion conference at which the provinces will be represented. Welcome News For Canada

U.S. Board Announces Plan To
Use Our Money At Current Rates

The Federal Reserve Board of the U.S. has issued the following official statement relative to U.S. exchange on Canadian currency:

"The Federal Reserve Board announces that a plan has been worked out, at the suggestion of the department of commerce, and will be put in operation for handling Canadian currency deposited with federal reserve banks, at a minimum of the actual collection charges incurred by them.

"The discount on Canadian currency brought into the U.S. by travelers has frequently ranged as high as 10 and sometimes even as high as 20 per cent., at places remote from the border line. This is regarded as excessive and has given rise to some feeling in Canada, especially as U.S. currency is generally accepted at par in Canada.

"The Federal Reserve Board has taken the subject up with the federal reserve banks, and they have agreed to offer their facilities to their respective federal reserve banks but will deduct an allowance to cover the actual exchange charges, and insurance and shipping charges, if any, from the federal reserve banks to the points of conversion into U.S. currency. The average cost during the past three years of converting Canadian paper currency into U.S. funds, including both exchange and shipping charges, has averaged less than 1 per cent.

"This method of handling Canadian currency by the federal reserve banks, will, it is hoped, result in substantial reductions in the cost of collecting this currency, and the banks, if member banks to their co-operate in this matter by extending a similar service to their customers, Canadian tourists travelling in this country will find American merchants willing to accept Canadian currency at or near par."

Best Market For United States Goods

For Second Consecutive Year Canada
Has Highest List

Canada was shown by the Chamber of Commerce of the United States to have been the best market for United States products during 1929, for the second consecutive year and also the principal distributor of foreign products in the United States.

An analysis, based upon Department of Commerce statistics, showed that Canada's purchases of United States products totalled nearly \$1,000,000,000 and were 18.1 per cent. of the total exports. They were larger by \$53,758,000 than in 1928, when Canada, for the first time, became the major buyer from the United States.

The United Kingdom was second as an export market, buying goods valued at \$967,560,000.

Imports from Canada were valued at \$504,000,000, the largest post war total, and an increase of \$14,974,000 over 1928. Japan was second in export to the United States, shipping over products valued at \$431,873,500.

Eats Like An Otter
An Alaskan puppy with the ambition of an otter has been saved from the consequences of his appetite at the Royal Veterinary College, in London, England. From his stomach were recovered 67 nails of various sizes, two screws, three bolts with nuts, one bolt, 10 brads, one stud, a piece of steel drill and a lump of coal, the whole weighing 15 ounces.

"I see where my time has gone," said the man as he received his watch from the mail order house.

"But you live on the other side of the road!"
"Bother. Now I must walk backwards!"—Wahne Jakob, Berlin.

W. N. 1. 1832

Douglas Fir Timbers Improved By Age

Experiments Show Gain in Strength
After Fifty-Year Service

Douglas fir timbers gain in strength after 50 years of service, according to E. H. McAllister, professor of mechanics, at the University of Oregon.

Professor McAllister has just completed an investigation of the timbers taken from the Hayden Bridge, a structure erected near Eugene in 1874, and has found them to be in an excellent state of preservation. The Hayden Bridge was of the old covered type and it is the professor's conclusion that Douglas fir can be preserved in sound structural condition for at least half a century by the simple expedient of keeping it covered from the weather and providing a free circulation of air.

More than 200 tests on machines which exert from 30,000 to 200,000 pounds pressure were made on the old timbers. For basis of comparison, similar tests were made on both green and seasoned pieces of the same size. The average strength was found to be in excess of the average strength of the green timbers in every direction, while in most cases it was well above the average for unused lumber that had been air dried for two or three years.

Professor McAllister's report stated that the tests proved conclusively that the influence of knots or other defects in the wood, and that tests on the aged timbers proved that the quality of the wood three times that of new green timber. Out of twelve old beams tested not one failed first in compression and about five of the 54 small beams broke after sustaining very high stress.

In the tests of other new bridge stringers made by the United States Forest Service, approximately three-fourths of the whole number failed in compression.

Cannibals Turning To Football and Cricket

Natives Of Solomon Islands Greely
Enjoy Modern Sports

Cricket and football have taken the place of murder and cannibalism as the national outdoor sport of the Solomon Islands.

Dr. C. E. Fox, in charge of the native education on the islands, has just returned by Auckland, New Zealand, with the news that the natives are beginning to forget their barbarous pastimes and to live a more civilized life.

"Solomon Islanders make very good footballers, even though they are not used to it," said Dr. Fox. "They are very skillful at passing and remarkably fast."

"Cricket is our national game, however," Dr. Fox added. "I do not think you will find brighter cricket in any other part of the world. The natives are of two mainings a side, and the time limit is two and one-half hours. Consequently, on time is lost, and there is no such thing as playing for a draw. In one match 56 runs scored off one stroke."

The ball was hit into the sea, and square leg, who objected strenuously to chasing it, was finally thrown into the water by the other members of his team, in order to retrieve the ball. The batsman, meantime, were steadily piling up the runs.

"On one occasion the ball was hit into a tree, which was cut down by the fieldsmen. The rules of foot ball out of bounds do not apply when there are 22 enthusiastic Solomon Islanders on the field. They are magnificent fieldsmen, and can catch any sort of ball with ease. Their bowling, too, is very accurate, but their batting is not, rather unpolished. It is interesting to watch the batsman take centre. This is regarded as a form of ritual, for as soon as it is done, the batsman promptly steps back a bit to leg, and prepares to hit at anything."

Prince (in hotel) — Twenty-five francs for peaches? They must be scarce this year.

Manager of Hotel — Your Highness, it is not peaches that are scarce, but prices.

"Oats to the fair?"
"What fair?"
"Paper says, 'Fair here today and tomorrow.'"

Excavation of Trajan's Market Place in Rome has been completed, and altogether 150 stores have been found in the ancient shopping centre.

Clean Your Seed

Results Obtained More Than Pay
For The Trouble

"As soon sown, so shall thou reap" wrote Cicero centuries ago and libel and mundane authors have kept this notion of nature ever before us; and the moral is—You may not always be able to sow the best of seed, but you can always sow clean seed.

Not only is it a well known fact that clean seed is a most effective method of seed control but that mental work by the Dominion Department of Agriculture, and the Canadian Seed Growers' Association shows that clean seed pays.

There is really no excuse for a farmer not planting clean seed because if he has not the time and means for doing it himself there is, or can be, available to him competent means of cleaning his seed.

The cleaning of seed is a practice which has been followed ever since man first began to plant, the methods ranging from the primitive to the ultra-modern. We are most of us familiar with the primitive practice of holding a measure of grain or seed shoulder-high and letting it drop to the floor, the breeze carrying the chaff along with it, leaving a pile of seed at the feet of the cleaner. We are also familiar with another primitive practice of float-testing many types of seed, particularly mangel and sugar beet.

The ultra-modern seed cleaning methods range from government seed cleaning plants at Moose Jaw, serving a part of the prairie area, to the adaptation of screens and sieves in the farming home.

The cleaner the seed the better its quality and while you may not be able to afford No. 1 clean seed always, you can afford, and will be more than repaid, to see that the seed you use is clean.

Poultry Will Fly

Quorum Exhibits For Congress Will
Travel By Air

Quite abreast of the times exhibitors at the fourth World's Poultry Congress, are already arranging an aeroplane conveyance for their birds, which will be shown in the live stock exhibition, and which they desire to have arrive at the Congress in the pink of condition. Leading air services are making arrangements to deliver birds from points in Continental Europe to the Crystal Palace, which will give the elite of the poultry world who travel in this way, something really worth while to crow and cackle about.

Loss Is Heavy

Twenty-six million dollars is the price paid by farmers and poultry raisers for loss through diseases in poultry flocks annually according to recent estimates. Most of this loss is caused by the internal parasite and according to P. C. Efford, Dominion Poultry Husbandman, much of it is preventable. A good deal of it, he points out, can be eliminated by keeping young chicks away from waste birds and on absolutely clean soil.

Holland Plans Produce Airport

Delft, Holland, will establish a farm produce airport. From it will be shipped fresh vegetables, fruits and flowers, for which the district is famous, to leading cities of Europe. Large amounts of fresh fruit, early vegetables and cut flowers have already been successfully transported by plane.

Give Chicks A Fair Show

If Kept In Separate Pens Results
Are More Effective

The baby chick becomes a laying pullet in about five months, but only with proper handling and when given an even break.

W. A. Brown, chief of the poultry division of the Dominion Livestock Branch, emphasizes one thing essential to the development of pullets which will begin to lay when egg prices are good; that is, give them a fair show. By this he means that they must be kept separate in pens by themselves where they will not be robbed by older birds of the foods provided especially for, and so necessary to, their proper growth and development.

Poultry records show that the time-honored practice of letting chicks run with old hens does not pay and that to get effective results in respect to pullets for egg production complete separation must be provided.

To allow chicks to run with the older hens is the biggest mistake the farmer or poultryman can make. Mr. Brown observes. It was the repeated failure in this respect that this week's article led to a special investigation as to its cause. The study of the problem began in the separate pens of a mixed flock which was giving poor results. The old layer-out hens were discarded and each age group and type was given a separate pen. One immediate and surprising result of this separation was that egg production from the smaller number of selected hens remaining very soon rose above the total egg production of the mixed flock.

Another thing which was found from this particular experiment was that birds best when grouped in separate pens in classes of their own age and sex. There are certain well defined stages of development in the chick, the pullet, and the hen, and where all are allowed to run together, no function as they should but when separated into age and type groups feeding can be controlled and regulated with direct regard to the needs and condition of each hen.

On every farm where it is desired to have laying pullets early in the season, when the price of eggs is particularly attractive, one safe rule to apply is to put baby chicks in a pen by themselves and keep them separate throughout the season. Properly fed and looked after they will become laying pullets weeks before they would were they allowed to remain in the mixed barnyard flock, and incidentally they will mature for utilization as dressed poultry if desired, much earlier than would otherwise be possible.

Canadian Roses For China

Bushes Numbering Thirty-Five
Varieties Shipped From British
Columbia

Three hundred British Columbia roses, numbering 35 varieties, were shipped to the British Legation at Peking, China, to adorn the already famous gardens. The roses were contributed free of charge by three nurseries—McEwen & Sons, of Sault Ste. Marie, B.C. Nurseries, of Vancouver, and the Layritz Nurseries, of Victoria. The bushes were carefully assembled and packed at Victoria under the supervision of E. W. Smith, district horticulturist, the Provincial Government paying the freight and packing charges.

Australia's coal strike has continued for several months.

Turn Loss Into Gain By-Products Is Increasing Revenue

Dairy Production in Canada Is
Slowly Forging ahead, but along new lines

The Dairy and Cold Storage Branch of the Dominion Department of Agriculture, report an increasing demand for what might justly be termed the by-products of the dairy industry. Dairy production in Canada heretofore has been expressed largely in terms of butter, cheese and cream. The production of butter and cheese shows a decline in volume, while "miscellaneous factory products" and "milk consumed fresh or otherwise" show a big increase, and it is this increase which is responsible for the net gain in dairy production during the past five years of over \$13,000,000. More fresh milk and cream are being used today than ever before; ice cream continues to grow in popular favor, and there is a striking increase in the amount of milk which is being processed for sale in evaporated, condensed, concentrated and powdered form.

A Musical Feature

Treat Prepared For Visitors To
World's Poultry Congress

By a happy coincidence, 1930 is the triennial festival year, and visitors to the World's Poultry Congress, will have the unique opportunity of attending a performance of the "Messiah," which will be given during the Congress week. An orchestra, and choir of 2,000 voices will be in charge of Sir Thomas Beecham, who has offered his services as conductor as a healthy acknowledgment of the importance which he directs to the first importance, and will afford an unusual opportunity for visitors to the Congress to hear one of the world's most famous composers' works rendered on a scale and in volume which alone begins to interpret a real masterpiece of music.

Only One Name Allowed

Practices Of Giving Middle Name
Once Forbidden In England

The practice of giving a middle name to children was unknown in England before the period of the Stuarts, and it did not become at all common until Georgian times. There was, in fact, a law on the statute books forbidding parents to give more than one name to their children. The name conditions prevailed in North America. Not a single member of the Mayflower had a middle name and there are only three among the signatories to the Declaration of Independence. The first five Presidents of the United States had one Christian name only.

Extending Hydro System

Extension of the provincial hydro system to all main centres of the province within the next three years is the aim of the Manitoba Government, as announced by Hon. D. G. McKenna, administrator of the power system, calling for expenditures of \$2,660,114 which includes \$902,808 for transmission lines and \$220,000 for farm services.

Made Fortune In Year

Achieving notoriety as the producer of the war play "Journey's End," Mr. Maurice Brown, who was unknown in theatrical circles a year ago, has purchased the Globe and Queen's theatres in the West End of London for \$1,000,000. This sum is a portion of the profits made from the play.

Horney, England, has banned the use of loud speakers and phonographs in stores.

The Prevention Of Sickness

Periodic Examination Would Save
Great Numbers Of Lives

In the Province of Ontario, one person out of every three is ahead of his time, and at that, Ontario is no worse in this regard than the other provinces of Canada. Better in fact than some of them.

Professor Winslow, of Yale University states that 29 per cent. of all deaths could be postponed. An analysis of Ontario statistics shows that in this province 31 per cent. of all deaths could be postponed. Such statistics are official, and the analysis is that of competent health officials.

It's shocking to walk along the street knowing that every third person you meet has death leaning affectionately over his shoulder. Such wastage would not be permitted in industry. What causes this gigantic waste of human life? The answer lies, just plain and thick-headedness.

If one person in every three was killed ahead of his time, it would be a crossing accident, such a public health and cry would go up that within a year, grade-crossings would be eliminated, regardless of expense. But our one-out-of-three loss is not so dramatic as that. It is brought about by the healthy ravages of diseases, and our husbands and wives and friends, therefore it isn't noticed for people have not yet learned that many of the diseases that kill their children, their husbands and wives and friends, could be prevented.

An inconceivable amount of sickness and premature death could be eliminated if people could be induced to get thoroughly examined, regularly, by their physicians. There is an enormous amount of "invisible" diseases of many types which, being neglected in early stages, result in serious disability demanding hospital care, and often resulting in death.

One of our leading public health authorities says: "Sickness costs Canada \$211,000,000 annually. The loss of future earnings through premature death is conservatively estimated at one billion dollars a year." Epithelioma kills 1,200 Canadians every year, while 12,000 other Canadians suffer from this disease but recover.

Yet science offers you a toxic treatment to make you and your children immune to diphtheria. This disease is a frightful scourge. Have you taken advantage of toxic to protect your children, or may they be among the stricken 12,000 during the next twelve months—or possibly among the doomed 1,200?

Typhoid fever kills 1,100 people in Canada in 1927. Yet typhoid fever is absolutely preventable by means within the reach of everyone.

Tuberculosis—8,000 people died of tuberculosis during 1927. Yet we have cut the death rate from this scourge in half during just 25 years, and we can absolutely eliminate it with adequate health machinery.

Cancer—early treatment (which is assured to anyone taking the trouble to undergo an annual or semi-annual physical examination) guarantees success in curing cancer, in many cases.

Venereal diseases—the organized and successful attack that this country is making upon venereal diseases is an utterly convincing proof of the progress that can be made in disease-control when all forces of the state combine in a necessary undertaking.

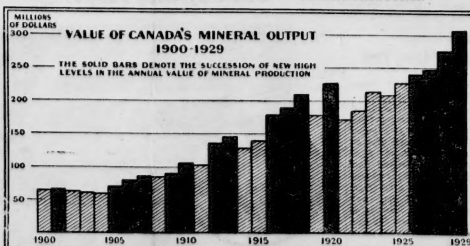

Japan's Oldest Temple

There is still standing in Nara a Buddhist temple, Horyu-ji, the oldest in Japan, built more than thirteen hundred years ago, but built of wood, probably the oldest wooden structure in the world. It is filled with priceless art treasures. Its mellow-toned bells seem to speak of romantic antiquity of long ago, of the days when Nara was at the height of its glory, and when men of genius were laying the foundations of the nation's art and literature.

Nitratol used in making fertilizer an important by-products from coal.

"You don't wear your glasses now?"
"No need with the present women's fashions!"—Lustige Blätter, Berlin.

CANADA'S REMARKABLE ADVANCE IN MINERAL PRODUCTION

During the thirty years embraced by the period 1900-29 inclusive, the annual value of Canada's mineral production has on no fewer than sixteen different occasions surpassed all previous marks. While the effect of the upward trend of prices must be taken into account, especially as regards the war period, this record is nevertheless a remarkable illustration of sustained growth and it stamps the mining industry as a foremost force in the march of Canadian development during the twentieth century.

The sheer increase in value—from less than \$65,000 in 1900 to well over \$300,000,000 in 1929—is amply impressive in itself. In manner in which it has been attained is no less notable. There has been a great advance in variety of output. At the opening of the century gold and coal were the only two items of Canada's mineral production, whereas the Dominion's present-day mining industry owes its magnitude not only to coal and gold, but to copper, nickel, lead, silver, zinc, asbestos, and, in short, to perhaps as wide a diversity of resources as any country affords to mining enterprise.

Major Developments in Canada's Air Mail Service Attracting Great Attention

Canada, with her vast area and widely scattered population, is advantageously situated to derive the greatest benefits from the development of internal air mail service. The great distances which separate the principal urban centres and the steady and broad-fronted advance of settlement and development serve to render postal communication by air particularly valuable in the Dominion. In addition, the Post Office Department of Canada has entered into a reciprocal arrangement with the United States postal authorities whereby Canada may take full advantage of the extensive United States air mail services connecting with points in Mexico, the West Indies, and Central and South America.

The establishment of Canada's official air mail service of comparatively recent date, but the conveyance of mail matter by air within Canada has been an actual fact for over ten years. In the early days of mail transportation by air, the Post Office Department, as a temporary measure, gave permission to the operating aviation companies to carry letters, entirely at the sender's risk and subject to a small fee ranging from five cents to twenty-five cents per letter, in addition to the regular postage. This fee was retained by the operating company.

"Successful operation of mail service," "sticker" services demonstrated beyond question the essential practicality of air mail transport in the Dominion, for these services were conducted in many cases under considerable operating difficulties and not on hard-and-fast schedules.

Civil aviation in Canada assumed proportions in 1927 which justified the Post Office Department in utilizing the facilities available for the fast transport of mails, not only to remote areas but between centres of population. Services of the latter type had of course to be arranged on definite time schedules and this involved a much greater problem. As a beginning a service was inaugurated by which incoming British mails were taken aboard Atlantic steamers and transported by air to Montreal, thus considerably shortening their delivery. Later, on October 1, 1928, a service of daily mail flights was established between Montreal and Toronto, and on the same day an international air mail route was opened between Montreal, P.Q., and Albany, N.Y. On June 15, 1929, the Montreal-Toronto route was extended to Detroit, via Hamilton, London, and Windsor, Ontario, and thus a point of contact with the United States air mail routes westward was established, in addition to providing the most densely populated portion of Ontario with speedy air mail service. On the same date a still further connection with southern air mail routes was provided by the establishment of daily service between Toronto and Buffalo. Notwithstanding the difficulties of operation in the Maritime Provinces—scarcity of suitable landing fields, densely wooded areas, broken country, and fog—the Postmaster-General inaugurated a service early in December, 1929, between Montreal, Quebec, Moncton, and Saint John.

The next major development in Canadian Air Mail Service was the inauguration of the trans-prairie route on March 3, 1930. Flights are now operating daily between Winnipeg, Regina, Moose Jaw, Medicine Hat, and Calgary, and between Regina, Saskatoon, North Battleford, and Edmonton on a schedule which clips a full twenty-four hours off the transcontinental movement of Canadian mails. This not only constitutes a marked advance towards the coast-to-coast service which is being developed link by link, but revolutionizes intercommunication between the provinces of Alberta, Saskatchewan, and Manitoba.

It is in the outlying portions of the

country, however, that the most valuable work of Canada's Air Mail Service has been carried out. Until recently the remote settlements along the north shore of the St. Lawrence River, on Anticosti and the Magdalen Islands in the Gulf of St. Lawrence, and along the remote reaches of the Mackenzie River, have been almost cut off from the outside world during the winter months. Communication was necessarily by dog team and other primitive methods until the recent dramatic change to swift aeroplanes reduced the duration of mail trips from weeks to hours.

The establishment of contract air mail service in the Mackenzie River District—the most northerly of all air mail services—in December, 1929, attracted widespread attention. The route from McMurtry, down the Athabasca River, along the south shore of Great Slave Lake, and down the mighty Mackenzie River is nearly 1,100 miles long. Hitherto, in winter months, dog teams had been the sole means of conveyance and the volume of mail was correspondingly small being limited to letters and a few newspapers. The total amount for mail facilities in the district was less than two hundred pounds. Contrast this with the remarkable conditions obtaining on the advent of air mail facilities. Ten thousand pounds of mail were carried on the first flights—over a thousand pounds almost daily in the winter months of the Mackenzie. The chief remaining routes are those which penetrate the rich mining areas of Ontario and Manitoba, and the great distances of the Northwest Territories. They are the principal mineral areas served by air mail in Canada.

The development of flying fields and provision of lighting facilities, and to mention the constant improvements in aircraft which may be expected during the next few years, will undoubtedly do much to facilitate the performance of regular scheduled air mail services within Canada. Meanwhile the efficiency percentages maintained by the different operating companies are remarkably high. In addition to holding the world's record for speed over contract air mail lines, the Canadian service proudly boasts that it has never lost a single piece of mail out of a hundred of tons that have been entrusted to it.

Mature Corn For Silage

Superior Over Immature Corn Proved By Tests

The superiority of silage from mature over immature corn is clearly demonstrated by tests conducted at the Dominion Experimental Farm, at Brandon, Manitoba. In a series of tests in which a group of six cows were fed alternately, mature and immature corn silage, a marked increase in the volume of milk produced, and in respect to gain in body weight, was shown by the group fed mature corn silage. The relative feed values shown by laboratory tests are: for mature corn 69.1 per cent. moisture content, 2.77 per cent. protein, .61 per cent. fat, 16.63 carbohydrates, 9.27 fibre, and 1.62 per cent. ash; for immature corn the moisture content was 82.6 per cent. protein 1.71 per cent. fat .91 per cent. carbohydrates 7.74, fibre 5.45, and ash 1.59 per cent.

Must Use Percentage Of Domestic Flour

Legislation Is In Force In Five European Countries

State legislation requiring millers to use a certain percentage of domestic flour in making of bread is in force in Germany, France, Spain, Switzerland, and Portugal. States Hon. G. M. Gillett, secretary of the overseas trade department, in a written answer to a question in connection with the proposal that the British loaf should contain a statutory proportion of British-grown wheat flour.

The minimum in France is as high as 97 per cent. it is declared. In Spain the minimum is 5 per cent. No percentage is fixed in Switzerland and Portugal, but millers in those countries must take delivery of a certain quantity of native wheat.

Under Soviet Rule

It's not all "cakes and ale" in Soviet Russia, according to Zachary Brantchko who has just received a pathetic letter from his brother in Omsk, Siberia. The brother writes that he has just received a letter at his wheat crop, bedding and furniture, leaving only 20 bushels of wheat for his family's use.

Still In Experimental Stage Difficulties Have Cropped Up In Connection With Battery Breeders

A recent report of the Dominion Experimental Farm would indicate that another much heralded innovation in the poultry industry is not destined to any great success. During the past two or three years, the battery system of breeding chickens has gained some prominence in Canada, the principle being that of raising chickens in a uniformity and correctly heated room in metal batteries. These batteries are simply crates placed one on top of the other with water and feed troughs for water and feed. Beneath the wire floor are papers to catch the droppings and which are easily removed and burned.

The advantages of such a system are quite obvious, it is really a factory of mass production of chickens. One can look after a large number of the tables and the wire floors make for complete sanitation. Temperature and fire risks are eliminated, spread of disease is minimized, and the feed and water troughs, which are placed under the wire walls of the compartment, are easily kept clean.

But some difficulties have cropped up and it would seem from the report that they are serious ones. In the first place, a temperature that suits day-old chicks in a long battery floor as might be supposed, and last, but not least, it was found that from four to six weeks is the oldest that chicks can be handled in this manner. Cannibalism and nervousness then develops in the chicks, and the mortality becomes high.

The report concludes that the battery system is still in the experimental stage and that at present will find its greatest use under hatchery conditions for the short time holding of chicks.

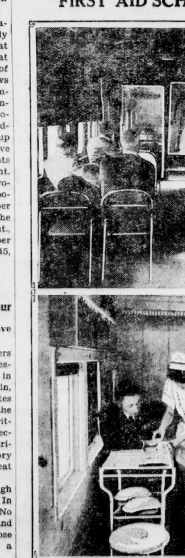

Writing To Take Chance

Norman Derham, who swam the English Channel in 1926, has written to Knute Johanson, a young Scandinavian, who proposes to cross the Atlantic in a speed boat, offering him his services as a companion, for whom Johanson has been advertising.

Vila—An empty champagne bottle seems so failures.
Mimi—What do you mean?
Vila—It's lost his pop.

It costs from \$1,600 to \$2,000 per mile to send a road.

FIRST AID SCHOOL ON WHEELS

With a view to extending adequate First Aid instruction to its employees in the outlying sections of the system, one of the three new First Aid cars which have just been completed for the Canadian National Railways has been placed in the Western Region for service.

Bully equipped as in charge of a course of instruction, the car will travel to outlying points, bringing courses of instruction to engine men and train men, agents and construction and maintenance of way men who have ordinarily no means of obtaining this knowledge. For instruction they are, as well, travelling stations ready to assist in emergency, and are the first cars of this type to go into service on a railroad in Canada.

Her Grace the 64-year-old Duchess of Bedford, who took off from London, on a flight to Cape Town, South Africa. With the duchess are two pilots and she plans to take her turn at the controls.

Colorado Interested In World Grain Exhibition

Farmers Of Peets District Plan To Enter Exhibit

According to the Peets Gazette, a weekly newspaper published at the town of Peets, Colorado, the farmers of that district are determined to demonstrate their ability to grow the best quality grain, states S. J. Latta, publicity agent for the World Grain Exhibition and Conference, to be held in Regina in 1932. They are already preparing to be represented in a number of selected cases at the World's Grain Show in 1932.

In an interesting article on the subject of grain raising, the Peets Gazette says: "Tentative plans are now being considered for the entrance of Peets grain wheat, rye, barley, oats, clover, and hog millet seed and beans in the competition for the thousands of dollars in prizes offered at the World's Grain Exhibition and Conference, to be held at Regina, Saskatchewan, August, July 25 to August 6, 1932."

"People of Peets feel they can favorably compete in this big show and the Peets Community Fair Association has already commenced to plan the details of gathering samples that will be displayed against all world comers."

In 25 years—from 1900 to 1925—the reindeer population of Alaska increased from 3,000 to 400,000.

Nearly 400 Christmas puddings were shipped from England to the United States last year.

Canadian National Parks, With Wonderful Scenic Beauty, Form a Great National Asset

The coming season promises to be one of great tourist activity as far as the national parks of Canada are concerned. Officials, both of the Department of the Interior and of the railways, report an unusually large number of requests for information and advance bookings. Large numbers of inquiries have also been received in the department from motorists in practically every section of Canada and the United States, and even from Mexico. The majority of these ask for the shortest routing to Canada's national parks, a description of the different attractions, the accommodations and particularly the facilities for camping.

A comparative analysis of the various applications shows that by all odds the strongest appeal of the parks is their scenic beauty and wilderness quality. An extract from one expresses the demand of many: "I want to visit the parks containing the prettiest mountain scenery, as I want to camp out in the wilderness, fish and go mountain climbing." Some of these letters reveal that the writers are not content with looking at Canadian geography. They have heard a rumour of the greatness of the national parks of Canada and they write to ask where they are and how they can get to them. Apparently it has come to be accepted in the minds of travelling public that the continent over that national parks represent the finest examples of magnitude, power, and beauty in nature.

(By Eva A. Tingey)

BEAUTIFUL AFTERNOON WEAR

All Tingey models are created and sketched in Paris and the patterns are made in New York. Even though chill winds and cold may be still with us, spring is not far away and the shops are stocking up with lovely new materials. All this creates a keen incentive to thinking of new clothes and making them.

Today's model is very slimming with the V and tiny front dip. It is lovely in cut for the normal and heavy figure. It can be made in natural waistline, or just below, as so many women prefer. A bow finishes the slender neckline, and others are attached to the wrists.

Materials: crepe de chine, satin, supply moire, wool, georgette, etc., are lovely tissues for this model. Navy promises to be a popular spring color, but light blue, green, violet, red greys and beige are good.

This pattern may be obtained in sizes 16 to 20 and 34 to 40. It is ready for immediate delivery. It is ready for immediate delivery. It is ready for immediate delivery.

Pattern price 25 cents. Be sure to fill in size of pattern. Address: Pattern Department.

scenery, in a setting of unspoiled primitive conditions, and their name is now sufficient guarantee of their attractiveness.

Visitors to the national parks come with varied aims. Some seeking health, others mere recreation, but the majority are impelled by a desire for rest and freedom. Whether they realize it or not, they are usually seeking a way of escape from the increasing complexity and routine of our highly mechanized competitive life into a world of peace, solitude, and inspiring beauty. In the face of the majestic grandeur of the Rockies, the enchanting loveliness of such places as Lake Louise, the Yoho Valley, Maligne Lake or Mount Robson, a man is lifted out of a pre-occupation with his purely personal problems into a kind of deeper satisfaction and a sense of well-being, as has been said, "through wonder into joy."

This, in the final analysis, is perhaps the strongest appeal of the national parks. They supply something which answers to a universal craving, a sense of freedom and well-being, of human being and which must become more deeply felt as population increases and conditions of life on this continent grow more artificial and restricted. Already, the world over, there is a recognition that our present mode of living is a sweeping original conditions everywhere. That is, perhaps, one reason why the recent announcement of Hon. Charles Stewart, Minister of the Interior, that he hoped the time would soon come when there would be no national park in every province has met with such wide approval. The more far-sighted of our people realize that the changes which will probably come about in Canada during the next hundred years will be enormous. While Canada is already leading the world in the conservation of areas for national parks, it is recognized that the needs of the future are more and more pressing. The time to set aside areas of natural beauty is now, while the land is still unoccupied and primitive conditions in many parts still undisturbed.

Visitors to the national parks last year reached over half a million people. This figure, large as it is, is only in its infancy. The creation of new parks such as the Riding Mountain park recently set aside in Manitoba, the extension and improvements of federal and provincial parks for highways now under way will provide new stimuli for travel and, incidentally, bring in new wealth to the Dominion. Expenditure of visitors to the parks range from a few dollars a day to as high as \$100 per day. One visitor to the Canadian West last year revealed that in addition to hotel and transportation expenses his party of four had spent \$8,000 during a three weeks visit, most of it with retail firms. Every new park created becomes an addition to our capital stock and increases our power of attracting tourists. It helps to swell the prosperity of the railway and steamship companies, hotels, lodging houses, retail and wholesale merchants, and in fact spreads out so as to affect every trade and industry. The name national park has come to stand for such a high degree of excellence that once an area is set aside as a park, travel tends to flow to it in ever-increasing volume. Both in the returns they can give in health and happiness and in actual economic results the national parks must become an increasing national asset.

New Method For Making Shoes

Factory methods used in mass production of automobiles are being introduced into leading shoe factory in Berlin. The German shoe is fabricated as it is transported on trays through the factory. The inventor claims the method will reduce costs and increase production.

News For Horse Lovers

Statistics Show They Are Hard To Displace

That farmers all over the world realize the advantages of horses for agricultural work, is shown by the following figures just published by the National Horse Association:

In 1788 the only horses in Australia were one stallion, three mares and a colt. In 1800 they had increased to 230. In 1850 to 159,851, and now there are 2,500,361.

In Great Britain there are 1,204,158 horses engaged in agriculture.

Despite the enormous depletion of horses in France during the war, there are now 3,000,000 in that country.

Although millions of pounds have been spent in the United States trying to displace them, there are 20,000,000 horses and mules in the country.

Germany has 3,800,000 horses, excluding those attached to the Army.

Irrigation Project A Success

Value Of Production In Lethbridge Area Greatly Increased

Farmers in the Lethbridge Northern Irrigation Project were very successful in 1929, according to the annual report issued by the Alberta Legislature by Hon. W. V. Smith, Minister of Railways and Telephones. The value of production that year was \$2,477,500, or an increase of \$832,257 over the year before. The occupied part of the Project is growing each year and now represents about half of the whole.

(By Eva A. Tingey)

YOUTHFUL CHARM

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Here's a darling frock for college girls and debutantes. It has a moulded bodice and softly flared skirt a style adorable for slim young bodies. The collar and cuffs are charming too, easy to make and so fascinating when finished.

Flat silk crepe and wool crepe are lovely for this model, but another suitable and charming medium is marocain.

Imagine, for instance, soft green or violet marocain, well made, ruffled with cream tinted valencienes to match.

Another extremely pretty way of treating the collar and cuffs is to use organdy with ruffles of narrow matching ribbon. Sometimes this is combined with a tiny metal edge which makes a most attractive finish.

Of course a bought collar and cuff set can be worn with this model. This pattern may be obtained in sizes 14 to 20 and 24 to 38. It is ready for immediate delivery. It is hand cut.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any moment to die. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and neutralize the gases. Sweeten the sour and acid stomach, relieve the gas and encourage digestion. The stomach, liver and bowels will be cleaned of poison, painless and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

Annuities For Judges

Legislation To Be Introduced At Present Session Of Federal Parliament

Legislation respecting annuities to judges of the Supreme Court of Canada and the Exchequer Court on reaching the age of 75 years is to be introduced at the present session of parliament.

A quotation placed on the order paper of the House of Commons by Hon. Ernest Lapointe, reads:

"That it is expedient to amend the Judges' Act to provide that an annuity equal to his salary at the time he ceased or ceases to hold office may be granted to a judge of the Supreme Court of Canada or of the Exchequer Court of Canada who held office on March 31, 1927, and continued or continues in office until he attained or attains 75 years of age; and that an annuity equal to two-thirds of the salary assigned to the office which he holds at the time he ceases to be a judge may be granted to a judge of the said courts, appointed after March 31, 1927, attaining 75 years of age after service of 10 years, or aggregate service of 10 years in that office and as judge of a provincial superior court."

Recipes For This Week

(By Betty Barclay)

PRINCESS SALAD

(Serves 6)

1/2 head lettuce.

1 can green asparagus tips.

2 fresh tomatoes.

2 large oranges.

Powdered milk and mayonnaise.

Place one slice of tomato on each salad plate on which has been arranged a bed of lettuce. Pyramid 3 asparagus tips on tomato slice. Top off with mayonnaise and a strip of pimiento. Arrange 4 sections of orange around the tomato.

ECONOMY MEAT PIE

Cut left-over meat and vegetables into uniform medium-sized pieces. Mix with an equal amount of medium cream sauce (1 cup milk, 2 tablespoons flour, 2 tablespoons butter).

Season well with onion, salt, pepper, etc. (Use left-over gravy with cream sauce if possible). Cover with a thick pie crust, biscuit dough, or layer of left-over mashed potato mixed with milk (one slightly beaten egg can be added to slightly if desired). Bake in a moderate oven until the crust is cooked, or until browned and heated through if food is used.

For Livestock Use

Banquet For Livestock Men

Old Times Will Be Entertained At Calgary Exhibition

One of the events of the 1930 Calgary Exhibition and Stampede will be the dinner to be given by the Canadian Pacific Railway on Tuesday, July 8th, to the men who were actively engaged in the livestock industry in the territory bounded by Moose Jaw on the east to Kamloops on the west, and from Red Deer River on the north to the International boundary, prior to December 31, 1929.

The guests must have been at least 20 years of age at that time and engaged in the ranching business either as owners, managers, foremen, cowboys, cooks or horse wranglers.

Filleting Of Fish

Filleting of fish in the Peter Pond district, a couple of hundred miles north of the Battleford district, in Saskatchewan, was undertaken this winter for the first time, when 40,000 pounds of whitefish and 5,000 pounds of jackfish were filleted.

In China there is one qualified doctor to every 740,000 inhabitants. In Great Britain the proportion is one to 1,400.

Grand Falls, in Labrador, is said to be the highest waterfall in the world. It is 2,000 feet high.

About one-half of every bone in a human body is phosphate.

SUNDAY SCHOOL LESSON

MAY 4

GIVING UP ALL FOR THE KINGDOM

Golden Text: "Lay up for yourselves treasures in heaven." — Matthew 6:20.

Lesson: Matthew 19:1-29.

Devotional Reading: Proverbs 8:1-11.

Explanations and Comments

In regard to Giving Up All For the Kingdom, verses 16-22. And behold one, a ruler of the synagogue, as Luke tells us (18:18), came to Jesus with the question, "Teacher, what good thing shall I do, that I may have eternal life?" His question was a natural one, for the religious teachers, the rabbis, differed greatly among themselves in their teaching and their practice. His coming was not to be a surprise to Jesus as the visit of the mothers with their children, a man not belonging to the class of self-satisfied religionists of whom he had had ample experience; with moral ingenuities, an open mind, and a good honest heart; a man, incidentally, probably with the teaching and practice of the rabbis and coming to the anti-rabbinical Teacher in hope of hearing from Him something more satisfying.—A. B. Bruce.

"Why asketh thou Me concerning that which is good? One that is good is God," and to obey His will is to do good. But if thou wouldst come to Me, keep My commandments. Jesus further explained which? Very naturally questioned the young man, for besides the commandments there were many other laws given by Moses and a multitude given by the scribes. In answer, Jesus cited the sixth, seventh, eighth, ninth and fifth commandments of the Decalogue, all of them bearing upon one's treatment of others, and then added from Leviticus 19:18, "Thou shalt love thy neighbor as thyself." All these things have I observed: what lack I yet?" the young man returned in surprise. Dean Farrar voices the young man's thought: "Surely the Great Teacher to whom I have come seeking for some great thing to do, or secret thing to know, cannot possibly give His answer that I am to keep these old, simple, elementary Ten Commandments, which I have known ever since I began to walk at my mother's knee! He must mean something far beyond that."

Dean Farrar comments: "It was exactly like the child in the poem who, having been talked to considerably about the glory and majesty of the sea, and being led to the seaside said, 'Is that the mighty ocean?' Is that all?"

"If thou wouldst be perfect, go, sell all that thou hast and give to the poor," answered Jesus. This was the one thing necessary for this man to do, for between him and the love of God, as well as the love of his neighbor, stood the love of possessions. For he was rich."

Powerful New Gun

A new gun capable of firing 20 calibre bullets nine miles at a rate of 800 a minute has been accepted by the U.S. navy department and will be manufactured as one of the newest and most deadly offensive modern arms. The gun is the invention of Robert F. Hiddon.

Canada's Hoovey Production

The annual production of hoovey in Canada is about 30,000,000 pounds, the principal commercial users being confectioners, bakers and bottlers.

Establishing Training Centres For Criminals

English Prison Commission Plans To Train Men In Suitable Work

As part of the scheme to reclaim young criminals, the English prison commission will establish a series of training centres, the first of which will be at Nottingham, where men of a special class between the ages of 21 and 26 will be sent. The aim will be to train each man in the work for which he is best suited. The men will work eight hours a day.

Sowing Sweet Clover

The Co-operative Creamery of Cardston, Alberta, announces the receipt of orders and sales of sweet clover seed in Cardston, to surrounding farmers totalling over 10,000 pounds. This is in response to its campaign among the farmers asking them to sow sweet clover seed this spring in the interests of an improving dairy and livestock business.

The aim will be to train each man in the work for which he is best suited. The men will work eight hours a day.

Speaking of the scheme, an official of the prison commission said in an interview: "Probably we shall attach some of the men to the building parties and engineers. There will be physical training, and in the evenings educational pursuits."

Further the official said: "Criminals will not be sent to the training centre direct by order of the courts, but will graduate from the prison to the training centre."

Oyen Taxes

I had some money left to me, upon the family Xmas tree, and as my taxes were not paid for want of cash I had delayed in paying them you see. So I paid them up the other day and what a tax I had to pay compared with years ago. My Father thought his taxes high but now I can't have apple pie because my money is all spent in paying taxes and the rent, no wonder that I sigh. I'm taxed for this and taxed for that, they even tax my dog and cat and every thing I have. I can't improve my property they tax me if I plant a tree or build a fence or paint my house, no wonder I begin to grouse, the tax I have to pay. They tax my car besides the tax I paid for license on that hack where will it ever end? If I should go to see a show I have to pay a tax you know before I can attend. If I decide to write a cheque to pay my taxes yes "by heck" I pay a tax on that. If into business I should go well there the taxes are not low believe me that's a fact. I pay a tax on all the stock on all the fixtures and the clock and on the shelving I declare they even tax the underwear; they tax the sugar and the tea and on the honey don't you see made by the little busy bee, I pay a tax for that. I have to pay a Sales tax too on every thing I buy mind you for that I do feel sore. And then on top of all you see the School just plants a tax on me no wonder I am blue. I think I'll go down to the well and tell them all to go to, well never mind the place. On second thought I change my mind and I'll do nothing of the kind but pay them up to date and now my money is all spent on taxes so I'll be content and try and earn some more. W. J. H.

About Town and Country

A school report for the term just ended, will be published in the next issue of the News.

Mr. Thos. Lees, Mr. James Lees and Mr. Jim Davis left last Sunday morning on a business trip to Calgary. They were accompanied by Alex. Wright who returned to the city to resume his studies at normal school.

Dr. and Mrs. W. D. McPhail and daughter Jean of Kindersley, were Oyen visitors last Sunday evening.

Mr. and Mrs. W. M. Sanders and family of High River, who spent the Easter holidays, visiting the former's parents at Landline, returned to their home last Thursday.

A regular meeting of the Board of Trade was held last Wednesday evening in Snyder's Garage.

The next meeting of the Board of Trade will be held at the hotel dining room at 8:30 p.m. on Wednesday, May 14.

For Sale—Some Used Plows and Cultivators—W. V. Miller, Oyen, Alta.

Automobile License Plates for 1930 may be had upon application to F. C. Bliss, at the Village office. Supply now on hand.

Mr. W. England of Calgary is spending a few days in town.

Mr. H. J. Cooper returned to Oyen the latter part of last week, after visiting his family in Calgary.

Mr. John Gripp and son Leonard motored to Drumheller last Saturday and returned home the following day with Mrs. Gripp and Helen, who is making a steady recovery after an operation for appendicitis.

Improvements made to the grounds of the local depot during the week included the setting out of a number of Spruce and Fir trees. This work of beautifying the depot grounds would be enhanced by painting the station buildings.

Don't fail to go see "Noah's Ark" in Oyen Theatre, May 6-7-8. It is one of the screen's great masterpieces.

The nation is so organized now that if you miss an evening of Anon's n' Andy, you hear most of it anyway in the course of the next twenty-four hours.—Detroit News.

The only time a horse gets frightened on the road nowadays is when he meets another horse.—Chicago Daily News.

Born—To Mr. and Mrs. Dean Walters of Seattle, Wash., on Wednesday, April 16, a son.

Mr. Gordon Casswell returned to Oyen last Sunday with his mother and son, after a motor trip in Saskatchewan.

Mr. John Gripp had the misfortune to lose a valuable barn on his farm on the N.E. 1/4 of 10-26-4, by fire of unknown origin.

"Noah's Ark" Showing Next Tuesday-Wednesday-Thursday

"Noah's Ark," a Warner Bros. production, heralded as having been made to top any picture ever shown on the screen, will be presented in Oyen Theatre, next Tuesday, Wednesday and Thursday, under the auspices of Oyen United Church Sunday School.

The picture opens in a modern setting in France, 1914. The victims of a train wreck, on reaching Paris, find the great conflict is on. They are carried into the tumult of the nations and later the story of Noah and the flood, is made a reality.

Built on a stupendous scale, "Noah's Ark" has many passages of real beauty and astonishing reality.

Tickets are now on sale. Don't miss seeing this wonderful production. It's a part talkie.

Adequate Moisture To Give Seed Good Start

During the past week the district has received an adequate supply of moisture to give seed already in the ground a splendid start. Commencing last Thursday evening rain commenced to fall, and 3.5 inch was recorded in the local rain gauge after the showers had ceased. On Sunday afternoon a light drizzling rain commenced and continued through the night, and all day Monday, with heavy intermittent showers, which totaled .86 inch.

THE GIANT AND THE DWARF

Overshadowed by the tone of steel making up the monster that has succeeded it, "Curly," as the engine is still affectionately known among veteran railwaymen, stands alongside a modern Canadian Pacific locomotive and measures only as long as the latter's cab and tender. Nevertheless, "Curly," tiny, tuff-funnelled wood-burner of pioneer days, can claim a record seldom approached anywhere in the world for long life, usefulness and endurance. "Curly" was brought to British Columbia in 1871 and W. H. (Bill) Evans (inset), engineer of the first Canadian Pacific passenger train to reach Port Moody in 1885, says it was built in a San Francisco machine shop and later aided Count de Lesseps in the Panama Canal region, not to mention construction work in Peru. Sixty years of arduous work left their mark on "Curly," but now the engine after a thorough refitting at the Canadian Pacific Vancouver shops, is to be exhibited at the Vancouver Exhibition in August, as a museum piece of the early days. Bill Evans was not out of moment for purposes of this picture and gladly donned the old overalls again to show himself once more in harness alongside "Curly."
